

K-LOVE improves my environment because it is positive and encouraging. This type of radio programming provides our community with music that not only brings about a positive mood, but keeps us focused on what is important in our lives. Our community is enhanced due to this type of radio program and I would be very disappointed if it were not available to me. I donate monthly and want to keep this type of programming on the air. Please do not deny this group of the American population from enjoying a type of music that is beneficial to our daily living.
